- EIA/TIA/IEEE Data Networks and Distribution
- Analog, Digital and VoIP Phone Systems
- Theatre Quality Sound Systems
- Synchronized Master/Slave, Wireless and GPS Controlled Clock Systems
- Public Address and Intercom Communications

Specializing in the Convergence of Electrical Power with Technology Services

## CONSTRUCTION, DESIGN AND CONSULTATION

New Construction, Renovation and Tenant Improvements—  
 including Moves, Additions and Project Changes

# CONVERGING ELECTRICAL POWER WITH TECHNOLOGY

DESIGN-CONSULTATION, INSTALLATION AND SERVICE FOR ELECTRICAL AND ELECTRONIC SYSTEMS  
From Underground Distribution—  
To Alignment of Your LCD Screens

Established in 1979 and under new management since 2004, La Jolla Electric remains family owned and operated. With more than 30 years of personal hands-on experience, owner John Glinatsis staffs each project with an equally skilled and dedicated workforce. Our core of talented project managers and skilled electricians will provide effective solutions—saving you time and money and helping conserve your valuable construction dollars. Strategic alliances with quality suppliers help us deliver the most advanced products and offer you solutions for all your energy and technology needs.

## GOING GREEN

Energy conservation takes a team of multidisciplinary experts working to meet the same conservation goals—architects, engineers and contractors, collaborating to match precise needs with available technologies.

Equipment, fixtures and controls—combined with expert installation and maintenance—are key features of sustainable buildings that actually reduce consumption and conserve resources without sacrificing user benefits.

We encourage our clients to utilize the latest technologies and long term cost savings associated with 'Green Power' conservation methods—wherever and whenever possible.

## CERTIFIED SBE

La Jolla Electric is certified by Dept. of General Services, Office of Small and Disadvantaged Business Services. But don't let our size fool you—we will outperform the competition, while providing you with expert owner-attentive results.

*"Since assuming ownership, John Glinatsis has established a reputation for La Jolla Electric as a high quality, well-organized operation that enjoys steady and well-managed growth. I have been working with contractors for over 25 years, and without a doubt, La Jolla Electric has earned the highest possible recommendation I can give."*

Larry Castro
